

Remote Backup

Our remote backup service uses your high speed Internet connection to automatically back up your critical files to a remote data center.

Fortress Computer Service has partnered with MozyPro to deliver this outstanding service at a price any company can afford.

Simple

The easy-to-use interface was designed with the “non-tech-savvy” user in mind. In addition, Fortress will install the software and make sure the system is working perfectly. All you need to do is show us what programs you use and want to protect. We'll do the rest to ensure your protection.

Automatic

MozyPro automatically backs up new and changed files. No need to change your work habits, MozyPro watches you and adapts to back up exactly the right files at the right time. No need to close programs or stop using your machine, MozyPro can back up all open and locked files, including your e-mail.

Secure

Your files are absolutely secure and private. Your files are encrypted with a secret key that you control. MozyPro cannot recover your files without your private key. The remote files are totally secure.

MozyPro's 24,000 square foot data center is located in Salt Lake City, Utah. Power is protected by six battery backup and three 1.7 megawatt diesel generators supplied with 10,000 gallons of fuel. The entire facility is monitored by onsite staff 24 hours a day, 365 days a year.

Pricing

Pricing is based on the number of machines protected and file size.

One-time setup fee

\$85 per computer, including custom installation and consultation.

Recurring fees

\$3.95 per Computer / month

\$0.50 per Gigabyte (GB) / month

Example

A typical small office will back up one computer and use 4 GB of storage space:

1 Computer with 4 GB

Computer Fee: \$3.95

Storage fee: 4 x \$0.50 = \$2.00
